CLAIMS

What is claimed is:

1   1.   A method comprising:

2   enabling an administrator to define a plurality of clinical trial parameters

3   through filling out fields in a set of computer forms;

4   storing the clinical trial parameters in a central database;

5   enabling clinical trial site personnel to enter subject enrollment data

6   corresponding to at least one clinical trial defined by the clinical trial parameters via

7   an Internet web portal;

8   storing the subject enrollment data in the central database substantially as it

9   is entered in time;

10   generating a chart displaying selected data aggregated from the subject

11   enrollment data to graphically portray subject enrollment attributes pertaining to a

12   selected clinical trail from among said at least one clinical trial.
